Moulds for the Production of Plastic Abrasive and Support Thereof

Examiner: Théodore Art Unit: 4191 SN: 10/583,162 March 10, 2008

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4 and 12-21, drawn to a mold coated with metal-matrix materials wherein at least one substance with non-stick properties is mixed in micronized form.

Group II, claims 5-11, drawn to a support for molds, comprising sets of molds driven and positioned on support guides, wherein said molds are removably secured individually to said support guides.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I does not require the support, plural molds, or support guides of Group II. Group II does not require the metal-matrix coating of Group I.

3. A telephone call was made to Mr. Keith Barkaus on March 6, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.
